KraussMaffei Appoints AutoRIM as Distributor for their EcoStar and RimStar Products

In order to expand and develop relationships within the insulation and standalone machine sectors, KraussMaffei has appointed AutoRIM Limited as distributor for the entire range of high-pressure polyurethane metering and mixing equipment within the UK & Ireland.

From left to right: Stephen Lambert, Business Manager RPM Division; Philip Hindson, MD AutoRIM and Mike Bate MD KraussMaffei UK.

KraussMaffei is the world's leading provider of reaction process machinery, offering a comprehensive range of technologies that include more than 20 state-of-the-art processes. They provide custom solutions for the foaming of polyurethane systems and ultra-modern surface technologies.

KraussMaffei's EcoStar and RimStar metering and mixing machines are of modular design, allowing them to be tailored to a customer's exact processing requirements. Outputs from 15g/sec to 5000g/sec are available for all applications of polyurethane manufacturing, whether processing with current or new generation blowing agent.

Based in Whaley Bridge, AutoRIM will work closely with KraussMaffei Group UK to provide customers with extraordinary levels of technical support from a countrywide combined network of polyurethane (PU) technology specialists. The after-sales service will cover both process and technical assistance, giving customers the peace of mind to know they've made the right choice.

KraussMaffei UK's Managing Director, Mike Bate, commented:

"AutoRIM's respected reputation is based on almost 40 years of manufacturing and innovation for the PU industry. They have a proven track record of meeting or exceeding the requirements of their customers, correctly specifying processing equipment, before delivering it on time and on-budget. Their specialist PU machinery service engineers will also ensure that equipment is correctly maintained and optimised, providing an extended and productive service life.

"In summary, AutoRIM's stringent levels of quality, reliability, and durability, coupled with consistently high levels of customer support, make them the ideal partner for KraussMaffei UK."

About KraussMaffei

KraussMaffei – Pioneering Plastics

KraussMaffei is among the world's leading manufacturers of machinery and systems for the production and processing of plastics and rubber. Our brand stands for cutting-edge technologies – for more than 180 years. Our range of services covers all areas of injection moulding machinery, extrusion technology and reaction process machinery. This gives KraussMaffei a unique selling point in the industry. With the high innovative power of our standardised and individual product, process, digital and service solutions, we can guarantee customers sustained additional value over the entire value-adding chain. Our range of products and services allow us to serve customers in many sectors including the automotive, packaging, medical and construction industries, as well as manufacturers of electrical and electronic products and household appliances. KraussMaffei employs around 5,500 people all over the world. With more than 30 subsidiaries and over 10 production plants, as well as about 570 commercial and service partners, we are represented internationally close to our customers. Headquarter has been in Munich since 1838.
